- Re-mineralizes and repairs enamel (Hydroxyapatite)
- Whitens teeth gradually with 0.1% Hydrogen Peroxide
- Soothes and moisturizes gums
- Prevents cavities, tartar & stains
- Safe and without side effects

Product description:

The Teeth Whitening Night Serum is a brand-new product developed by Beconfident. The serum repairs enamel and whitens teeth as you sleep. Due to the innovative formula, it helps to strengthen and fill micro-cracks in the enamel during the night as it simultaneously removes discolorations and tartar. The result: Repaired, strengthened and visibly whiter teeth with shiny surface. The product is brushed onto teeth after being cleaned in the evening, and then left onto teeth to work over night. The formula contains Hydroxyapatite which helps to repair enamel and strengthen the teeth. It will clean and whiten teeth gradually without any hard ingredients or side effects.

Active ingredients / How it works in short:

The enamel consists of about 97% of hydroxyapatite. The serum also contain Hydroxyapatite and will support the natural repair process during the night. Even incipient caries lesions can be repaired. Daily brushing with a hydroxyapatite-containing toothpaste also helps to seal the so-called dentine tubules. In the case of exposed tooth necks, the pain sensitivity associated with thermal and chemical stimuli can be significantly reduced.

The 0.1 peroxide is used for home tooth whitening. By activating it only in the mouth, the handling is very simple. It helps to reduce external tooth discoloration coming from black tea, coffee, smoking and other external sources.

The serum also contains a sodium salt called Tetranatriumpyrophosphat that helps to dissolve the discoloration of the teeth and to remove them more easily. Furthermore, the pyrophosphate has the property to restrict the formation of tartar. It also contains sorbitol which has moisturizing characteristics and Sodium Fluoride to prevent caries. The Chamomile is an extract from the flowers of chamomile which has a soothing effect on the gums.
